

Personal Portfolio Website

A modern, responsive, and visually appealing **Personal Portfolio Website** built using **HTML5** and **CSS3**. This portfolio serves as a digital resume, showcasing my skills, projects, education, achievements, and contact information in a clean and professional layout.

Project Overview

The Personal Portfolio Website is designed to establish a strong online presence and highlight my technical expertise, projects, and career aspirations. It features a responsive design that provides an optimal viewing experience across desktops, tablets, and mobile devices.

This project was developed as part of my web development internship to demonstrate front-end development skills and modern web design practices.

Features

-  Responsive Home/Landing Page
 -  About Me Section
 -  Skills Showcase
 -  Projects Portfolio
 -  Downloadable Resume Button
 -  Contact Information
 -  Social Media Links
 -  Mobile-Friendly Responsive Design
 -  Clean and Modern User Interface
 -  Smooth Navigation Between Sections
-

Technologies Used

- HTML5
- CSS3
- Flexbox

- CSS Grid
- Media Queries
- Font Awesome (Icons)

Project Structure

Personal-Portfolio/

```

└─ README.md
```

Getting Started

Clone the Repository

git clone <https://github.com/your-username/personal-portfolio.git>

Run the Project

1. Open the project folder.
2. Ensure your profile image is placed in the correct location (for example, profile.jpg or the assets/images folder, depending on your HTML).
3. Double-click **index.html** or open it with your preferred web browser.

No additional installations or dependencies are required.

Website Sections

Home

- Professional introduction
- Profile picture
- Resume download button

About

- Personal introduction
- Educational background
- Career objectives

Skills

- HTML5
- CSS3
- JavaScript
- PHP
- MySQL
- Git & GitHub

Projects

- Landing Page
- Calculator
- Temperature Converter
- Portfolio Website
- Other web development projects

Contact

- Email Address
 - Phone Number
 - LinkedIn Profile
 - GitHub Profile
-

Learning Outcomes

Through this project, I gained practical experience in:

- Semantic HTML structure
 - Responsive web design
 - CSS Flexbox and Grid layouts
 - UI/UX design fundamentals
 - Website navigation
 - Personal branding
 - Cross-device compatibility
 - Version control using Git and GitHub
-

Future Enhancements

- Add JavaScript animations
 - Dark/Light mode toggle
 - Project filtering by category
 - Contact form with backend integration
 - Blog section
 - Skills progress bars
 - Typing animation
 - Scroll animations
 - Project image gallery
-

Screenshot

Add screenshots of your portfolio website here.

Project Purpose

The purpose of this project is to create a professional online portfolio that showcases my technical skills, completed projects, and achievements. It also demonstrates my understanding of HTML, CSS, responsive design principles, and modern web development practices.
