

Responsive Landing Page

A modern and responsive landing page built using **HTML5** and **CSS3**. This project demonstrates the fundamentals of web development, including page layout, navigation, responsive design, and styling techniques.

Features

- Responsive Navigation Bar
- Hero Section with Call-to-Action Button
- Features Section with Cards
- About Section
- Contact Section
- Footer
- CSS Flexbox Layout
- Hover Effects and Transitions
- Mobile-Friendly Design using Media Queries

Technologies Used

- HTML5
- CSS3
- Flexbox
- Media Queries

Project Structure

```
landing-page/  
|  
├─ index.html  
├─ style.css  
└─ images/  
    └─ hero.jpg
```

How to Run

1. Download or clone this repository.
2. Open the project folder.
3. Open `index.html` in any modern web browser.

Using VS Code

1. Open the project folder in Visual Studio Code.
2. Install the **Live Server** extension.
3. Right-click on `index.html`.
4. Select **Open with Live Server**.

The project will open in your browser and automatically reload when changes are saved.

Project Sections

- Header / Navigation
- Hero Banner
- Features
- About Us
- Contact Information
- Footer

Learning Outcomes

Through this project, you will learn:

- Structuring web pages with HTML
- Styling using CSS
- Creating responsive layouts
- Using Flexbox for alignment
- Applying hover effects and transitions
- Organizing project files effectively

Future Enhancements

- Add Bootstrap Integration
- Include Animations and Effects
- Add Dark Mode Toggle
- Add Contact Form Functionality
- Improve Accessibility
- Optimize for Performance
